# NUIX FOR FOIA REQUESTS

Reduce cost and save time with automated, repeatable disclosure processes

Each information request is unique and involves an onerous, often manual process of searching, reviewing and redacting small to very large data collections. Time-consuming and costly, these requests are increasing in number every year. Nuix Discover® provides a customized, seamless data management solution to this challenge that makes the FOIA request process quick, efficient and repeatable.

ANSWERING YOUR FOIA NEEDS

Using our proven software, you can supercharge your ability to identify and disclose information by:

- Finding results within even the largest, most diverse stores of information, faster than any solution on the market

- Opening review of data to analysts of all technical levels, from seasoned data professionals to non-technical analysts

- Performing bulk auto-redaction of protected data by named entities, saving time and money on repetitive tasks

- Using one technology across your agency to answer FOIA, investigation, and eDiscovery needs.

Reviewers can quickly find responsive documents via keyword search, concept cluster, or social network analytics.

WITH NUIX SOFTWARE YOU CAN:

- Record and track FOIA requests

- Search and retrieve responsive data quickly and easily

- Create custom templates for your organization's unique workflow

- Maintain projects in a central location with all changes tracked

- Review, tag, and code the information and redact for exemptions

- Create and track exemption verification and approval workflows

- Use reporting tools to document full and correct completion of requests

- Utilize predictive coding to auto-sort and cull large collections

- QA work product and preserve all versions of produced documents

- Collaborate with other parties to fulfill the request

- Incorporate data analytics for separation of exemption documents from data sets

- Create automated disclosure and exemption summaries

- Standardize production process and produce in PDF, image, or electronic file formats

- Provide online access to the disclosure sets

- Manage error correction and appeals to exemptions

- Maintain a repository of disclosed/redacted information for future use.

BUILDING YOUR PROGRAM ON NUIX

Nuix is used by government agencies and commercial sector organizations for many reasons. It powers digital investigations, drives legal eDiscovery, and enables incident responders to react quickly and efficiently to data breaches. But what mix of Nuix works best for your FOIA responses?

- Nuix Workstation performs the 'heavy lifting' of churning through terabytes or even petabytes of data, no matter what format it's in, at a scale and speed that's unmatched in the industry

- Nuix Discover is renowned for its powerful review, analytics, and production capabilities. It can take in search terms, auto-redact sensitive or protected records and employ powerful analytics to ensure you're producing all the right information for the request at hand.

MAXIMIZE YOUR INVESTMENT WITH FLEXIBLE DEPLOYMENT OPTIONS

- Identify, track and collect requested information by date or custodian from your organization or submit a request to other organizations

- Ingest collected documents into Nuix Discover and extract metadata (to, from, title, date, etc.) for searching, sorting and organizing

- Search, review, highlight and code documents. Separate non-responsive and responsive documents using FOI specific coding templates. Auto-create, assign and track organized batches for review. Review similar documents together in a visual document map

- Produce and export document collections in native or TIFF formats with or without OCR or as individual or bundled PDFs. Export a Vaughn Index and automatically log and save all productions

Unlike other tools, your Nuix investment goes far beyond this single use case. Nuix technology is designed to help you gain intelligence from your data, working well beyond just immediate use cases. This allows organizations to share the budgetary burden and maximize technology dollars.

Nuix (www.nuix.com, ASX:NXL) creates innovative software that empowers organizations to simply and quickly find the truth from any data in a digital world. We are a passionate and talented team, delighting our customers with software that transforms data into actionable intelligence and helps them overcome the challenges of litigation, investigation, governance, risk and compliance.
