

Nuix Discover delivers end-to-end eDiscovery without compromise. Nuix Discover combines the world's leading eDiscovery processing, review, analytics, and predictive coding in one software solution to help your law firm master all phases of eDiscovery from a single easy-to-use, self-managed application.

Law firms have never been under more pressure. Clients expect you to be both legal and legal technology experts, and for your hourly rate to include both. The eDiscovery techniques and tools you used just a few years ago simply aren't adequate any longer.

THE NUIX ADVANTAGE

- Amazingly fast review.** Nuix Discover's intuitive user interface and intelligent automation capabilities allow legal teams to dramatically improve the speed and quality of document review while also delivering advanced analysis of case strategy.
- Integrated analytics.** Nuix Discover includes a fully integrated analytics suite, so all members of the legal team can apply data visualizations and analysis to find key facts and fact patterns more quickly.
- Built for the business of eDiscovery.** Nuix Discover helps you manage all your client litigation matters more efficiently with multi-tenancy; client- and case-level reporting and tracking; rapid start-up, training, and support; and cross-functional eDiscovery workflows.

Nuix Discover's intuitive user interface allows reviewers to complete each task with fewer clicks.

GET STARTED SOONER

With processing, analysis, review, and production fully integrated into Nuix Discover, you can quickly ingest data and start reviewing documents in minutes—no load files, no exports, and a full portfolio of analytics and visualizations.

FIND THE FACTS FASTER

Incorporate analytics into your everyday initial and linear review workflows to figure out what's going on and define your case strategy. Industry-best models for clustering, mapping, and graphing distill the whole case into easily understood 'a-ha' moments. Nuix Discover's machine learning capabilities mean every time you make a coding decision, your next review assignment is more relevant.

BREEZE THROUGH LINEAR REVIEW

Escape the repetitive grind of linear review and make faster decisions in a single view. Nuix Discover's patented user interface uses visual cues and continuous active learning to ensure reviewers can quickly identify relevance and privilege without needing to search for information from hidden windows, tabs, or other inefficient UI mechanics.

CALL THE SHOTS

Manage the eDiscovery process end to end with self-service case set-up and administration. Even for the smallest matters, you get all the analytics, review efficiencies, and production capabilities at your fingertips.

SCALE SEAMLESSLY FROM A SINGLE PST TO 100 MILLION DOCUMENTS

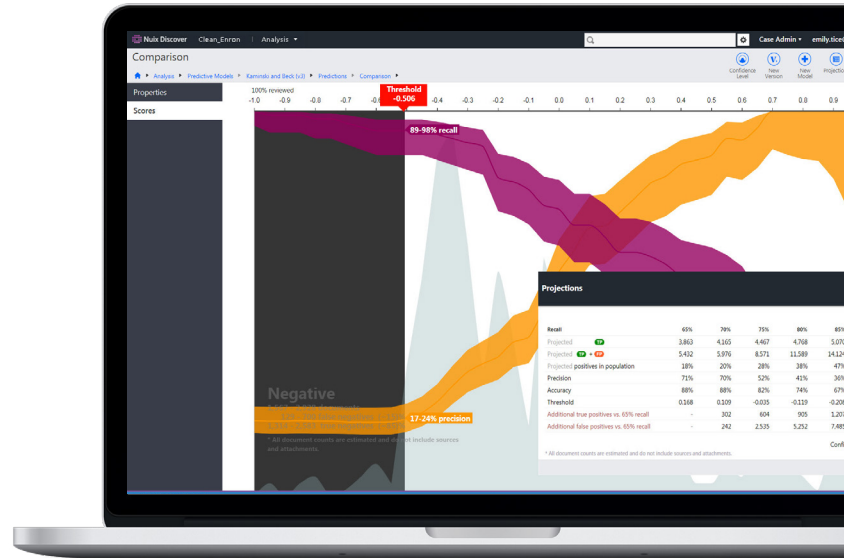

Nuix Discover is designed for scalability in data volumes and number of users. No matter how big or small the case, you can automate the way information is processed, organized, and presented to reduce operational costs and simplify hand-offs.

TAKE THE HASSLE OUT OF BILLING

Built for the business of eDiscovery, Nuix Discover gives you multi-client administration and reporting from a single view. Reports for single or multiple cases can be used as a basis for cost management and allocation, charge-backs, and invoicing.

FLEXIBLE DEPLOYMENT OPTIONS

Law firms of any size can succeed with Nuix Discover's flexible and secure deployment options: on-premise or remote software as a service. Pick a model that suits your needs, from self service to managed administrative service.

Nuix Discover's powerful analytics, data visualizations, and predictive coding are all included in the base license.
