

NUIX RAMPIVA

Experience the transformative power of Nuix Rampiva by optimizing your team's activity for greater innovation, productivity, and impact.

Growing data volumes, new regulatory pressures and a tightening labor market are making it hard for eDiscovery, investigations and data governance teams to meet deadlines without risking mistakes and burnout. With Nuix Rampiva, teams can standardize expert workflows, maintain a 24-hour processing queue, and improve access and resources controls. All while gaining comprehensive, real-time insights into departmental operations. Unlock the power of Nuix, with advanced automation, orchestration and analytics capabilities in Nuix Rampiva. Deliver results faster, while solving new problems and reducing resource demand.

GET RESULTS FASTER

> AMPLIFY REAL EXPERTISE

Automate workflows that take full advantage of Nuix's advanced features. Enjoy interconnectivity with other systems, and enhanced scripting logic to make every user a Nuix expert.

> SUPERCHARGE YOUR TEAM

Deliver more projects while spending less time executing tasks, managing licenses, or customizing outputs.

> SHOWCASE SUCCESS

Comprehensive, real-time and dynamic dashboards track evidence, activity, and output while delivering administrative control and showing the real impact of your team.

> SOLVE NEW PROBLEMS

Take advantage of heightened operational control to deliver fit-for-purpose workflows, resources, and results. More efficiently serving persistent requests, while providing cost-effective and innovative solutions to new challenges.

THE BEST END-TO-END PLATFORM FOR SEAMLESS ACTIVITY FROM LEGAL HOLD TO REVIEW

Nuix Legal Hold – Launch legal hold notifications and surveys that empower custodians to prioritize files, folders and whole machines for immediate collection and processing. Let your stakeholders guide you to urgent material immediately relevant to the issue at hand before you spend the time and money to run through the full eDiscovery process.

Nuix Cloud Collector – Trigger hold-in-place, search, full collections, filtered collections, or post-review collections using native automation of Microsoft 365 Purview API. Nuix Rampiva will take care of the staging and export activity so your team can stop checking progress and focus on critical work.

Nuix Aconex Connector – Accelerate your file gathering process while preserving crucial metadata and communication flow by utilizing Nuix Rampiva's custom-built connector, enabling a swift digital collection at a remarkable speed of 30 GB per hour.

Nuix ECC Automation – Optimize coverage and accelerate results with Nuix Rampiva's "Just In Time" deployment of forensic agents to execute metadata scans, in-place search, and full forensic collections. Accessible as stand-alone activity or part of an integrated workflow triggering collections based on custodian responses to surveys and immediately staging collected data, for processing or analysis.

Review Automation – Take your automation to the next level. Set key criteria including clients, matters and users. Build workspaces, update templates, add data, run native operations, track performance, send notifications, and loop data back to the Nuix Case for ongoing insight and analysis.
